

## Late availability for a Raptor Special photo trip in Catalonia

**Birding In Spain** and **La Sabina** have been successfully offering hide photography to keen bird and wildlife photographers from around Europe since 2008.

**This January 2103** we have hosted 12 photographers from Germany, Spain, Sweden and France, and all have gone home with their high expectations fulfilled or surpassed.

Among them they have photographed these 8 species of raptor from our hides:

Lammergeier  
Bonelli's Eagle  
Goshawk  
Red Kite  
Black Vulture  
Griffon Vulture  
Marsh Harrier  
Common Buzzard

Unfortunately we cannot show you all their images because they are still sorting through them and enjoying them on their own first! However, we can show you a few taken by **Swedish photographer Jan-Michael Breider**.

*All photos here by Jan-Michael Breider*

You can see more of Jan-Michael Breider's work while in Catalonia at the following link:

[http://www.pbase.com/breider/catalonia\\_2013](http://www.pbase.com/breider/catalonia_2013)

Although our spring plains birds photo trips are all but **fully booked** this year, we still have some **dates available** for a **raptor special** photo trip this **February and March**.

These are the dates still available at the time of writing:

From 11<sup>th</sup> to 16<sup>th</sup> February  
From 6<sup>th</sup> to 15<sup>th</sup> March  
From 24<sup>th</sup> to 30<sup>th</sup> March

**Contact us** to find out more, and if **special conditions** can be applied to you or your group.
